SECTION I: DESCRIPTION OF PROGRAM

The Halmos College of Natural Sciences and Oceanography at Nova Southeastern University provides foundational study in core and emerging disciplines and technologies to prepare students for graduate and professional study, career development, and responsible citizenship. The College highly values our partnerships with the basic science/clinical researchers of the Atlantis Project.

In the Atlantis project, students will be rotating through various medical departments in one of two hospitals in either Zaragoza or Talavera for six weeks. They will shadow doctors in surgery, trauma, nephrology, pathology etc. with no more than two students per physician.

The Biology Student Internship Program is a unique collaboration between NSU and the Atlantis project, which allows for intercampus and institutional interaction in multiple medical disciplines whereby young scientists gain exposure, direction and guidance during their developing career paths. The benefits of this program are as follows:

- To foster intercampus and inter-institutional collaborative relationships on both a national and international level
- To educate and train young scientists
- To produce outcomes that will allow for successful acquisition of extramural support

This collaborative venture with our partners will contribute to the leadership of all institutions in basic science and medical education and help to meet the needs of our national community through basic science and academic training, high-quality collaborative relationships and gaining the interest and exposure from future basic scientists/clinicians and the community.

Participant Eligibility. Any individual desiring to participate must have JUNIOR or SENIOR ranking and be a returning registered student for Fall 2020. Other criteria include: an overall GPA of 3.0 and a GPA of 3.0 in basic sciences. Candidates must submit an application inclusive of a written statement discussing the reason(s) why participation is desired, and an Official University Transcript of Grades or equivalent Capp report. Three letters of recommendation must also be included: 2 from basic science faculty, and 1 other. All application materials must be received by the Biology Student Internship Program Committee (BSIPC) no later than October 31, 2019. The timeline follows below.

Monday, May 11 OR 18, 2020
Summer Internship begins. Student interns communicate regularly with their NSU faculty mentor.

Friday, July 3, 2020
Summer Internships End (unless extended 1-2 additional week(s))
Summer Interns complete all requirements and turn in assignments for grading to their NSU Faculty Mentor.

July 10, 2020
Summer Interns complete all requirements and turn in assignments for grading to their NSU Faculty Mentor.

Fall, 2020
Summer Interns do presentations of their summer internship experience to students, faculty and staff.

BSIPC Role. The Biology Student Internship Program Committee (BSIPC) will qualify and rank candidates and select those who will be granted a face-to-face interview by the committee. Following the BSIPC interviews, up to eight finalists will be identified. Additional interviews of the finalists by the respective partner institutions either by phone or face-to-face may also take place.

Length & Location of Internship. There are up to eight six-week internship positions available for summer 2020 at one of two hospitals in Spain. If the original internship Awardees to Spain, declines their internship or during their BIOL 4950 course changes his or her mind, one of the alternates may be selected to replace that Awardee.

Program Outline.

A. Spain. The intern’s primary responsibility includes shadowing doctors in surgery, trauma, nephrology, pathology etc. with no more than two students per physician.

B. Course Credit. Awardees of internships will be required to register for a total of 3 credits of BIOL 4950 (Internship in Biology) at Nova Southeastern University between winter 2020 and summer 2020. The awardee must maintain a “daily journal”; write a summary paper and turn in all required assignments by July 2020. The paper will be critically reviewed and commented by the supervisors at NSU and graded by their assigned NSU Faculty Mentor for a final assignment of course grade.

The Awardee shall be required to give a presentation of their internship/research experience to faculty and students at Nova Southeastern University upon their return to campus in the fall of 2020.
